

Haven Hubbard Old Peoples' Home Near New Carlisle to Bring About Realization of Lifetime Dreams of Friend of Elderly

Upper—Side elevation of Haven Hubbard home. Below—Front elevation.

A dream, long cherished and often thought of, its realization once prevented by death, will come true in the completion of the Haven Hubbard Old Peoples' Home near New Carlisle, the construction of which is to start in the near future. A home—not a poor house or an infirmary—will be provided for aged persons who are in need of such and the dream of Haven Hubbard of New Carlisle, whose death prevented his carrying out his desire, will be realized.

Mrs. Hubbard, with whom Mr. Hubbard had often discussed his plans, was desirous of following them out, and with this in mind asked the advice and opinions of various persons. A suggestion was made finally, which if carried out, Mrs. Hubbard thought would come closest to the wishes of her late husband. The suggestion involved her giving the Hubbard farm property, worth approximately \$150,000, to the Evangelical Association of America. The farm, which was equipped with all modern conveniences and in an excellent state of cultivation, was accordingly deeded to the association of trustees of which incorporated the proposed home under the laws of the state of Indiana and took over the property. One of the provisions

of the gift was the erection of suitable buildings on the premises, and this part of the agreement is now being carried out.

The farm is considered an ideal site for a home of this kind, located as it is on the Chicago-Detroit highway about 13 miles west of South Bend and two miles northeast of New Carlisle on the Chicago, South Bend and Northern Indiana railway.

The conditions of entrance into the home, it is said, will not be prohibitive.

The building, as it has been designed upon, will be of adequate size and moderately equipped, will be built in the shape of a "T," the main part having a frontage of 246 feet, exclusive of verandas, and a depth of 44 1/2 feet. To the rear is an 88-foot wing. The superintendent's quarters and the Administrative department will be located in the central part of the main building, on each side of which will be a number of guest rooms opening into the corridor. At the ends of the corridor are large sitting rooms opening into large verandas on the east and west ends of the building.

The building will be two stories in height. The exterior will be of Saraband, Chinchilla brick, with Bedford stone trimmings and slate roof. The interior finish throughout will be Southern Gum, natural finish, and hard maple floors. All plastered walls will be painted. The building will have an ample water supply derived from two separate wells on which will be installed two high pressure electric driven pumps discharging into two large steel pressure storage tanks. The boiler room, dining room, a private dining room, kitchen, pantries, storage and stock rooms will be located

all fire proof, and it is further protected by the installation of fire hose throughout the building. Two large storage cisterns will supply soft water to the kitchen and laundry equipment. The building will be heated by the Modulated Vapor Steam System.

On this page is shown the front and side elevations and first floor plan of the New Memorial Home, as per drawings by Preyermuth and Mauer, architects of South Bend, Ind. The general contract for the construction of the building has been awarded to Kuehn and Jordan, South Bend, Ind., for the sum of \$99,000. The heating plant will be installed by the A. J. Moser & Co., Erne, Ind., for the sum of \$8,476. The plumbing will be put in by John Dister, Mishawaka, Ind., for the sum of \$10,192. The wiring for electric service was awarded to Colip Brothers, South Bend, Ind., for the sum of \$1,481.40. The electric fixtures and finishing hardware will be let under separate contract. The electric current will be supplied by the Indiana & Michigan Electric Co. Substantial furnishings and equipment will be purchased in due time. Opportunity will be given for various church organizations to provide the money for this purpose.

Farmer Sues Railroad For Killing Animals

GOSHEN, Ind., April 11.—The Baltimore and Ohio Railway Co. is defendant in a suit for \$1,000 damages filed in circuit court here by William W. Feldman, an Elkhart county farmer residing near Napanee, who seeks such judgment as the result of five of his animals—four horses and one mule—having been killed by a train when they were strayed on the track near the Feldman farm.

Feldman alleges the engineer of the train saw the animals on the right of way and that he had ample time in which to stop his engine, but that he neglected his duty and failed to do so, the killing resulting.

The exchange acts as a check," said Miss Gregory, "so that there is no duplication of effort. Organizations which become interested in a certain family can find, through the exchange, whether another organization is also interested and give aid.

The exchange consists of a card index in which are filed the names and addresses of all families who have received aid of one kind or another from charitable and social service organizations of the city. Information regarding the family is not kept on file, according to Miss Gregory, but persons who are genuinely interested are able, through the exchange service, to get in touch with organizations or persons who know the family and its needs.

"The exchange acts as a check," said Miss Gregory, "so that there is no duplication of effort. Organizations which become interested in a certain family can find, through the exchange, whether another organization is also interested and give aid.
